

Description

- Delay On Make Timer: PA-01 Series is a timer used to delay the operation of a load according to the preset time.
- Operates with a voltage range of 18-240 VAC.
- Can drive a load up to 1.5 A.
- Adjustable time range from 0.03 to 10 minutes.
- Easy to install and convenient to use.

Operation

Delay On Make Timer: PA-01 Series is a timer used to delay the operation of a load according to the preset time, with an adjustable time range from 0.03 to 10 minutes.

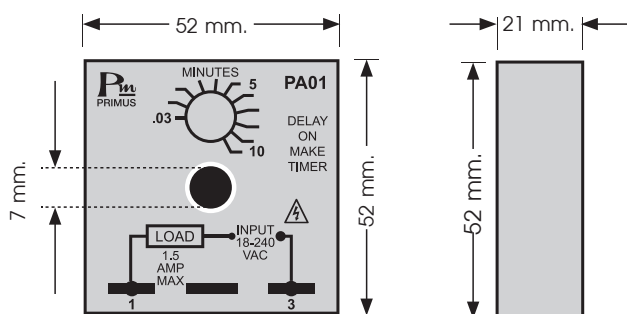

When power is supplied to the PA-01, according to the timing diagram, the timer will count based on the preset time, and when the set time is reached, the PA-01 will close the internal circuit to activate the load.

If it is necessary to start the delay timing again, turn off the power supply to the PA-01 and then reapply the power.

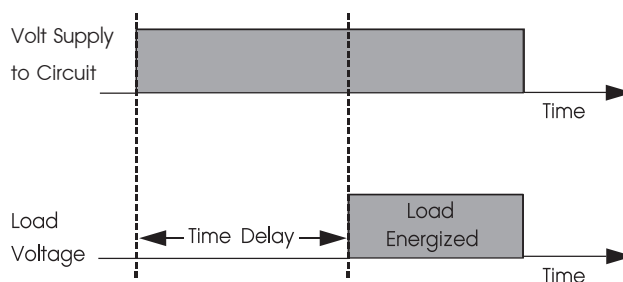

Specification

Power Supply	18-240VAC	
Frequency	50-60Hz	
Temperature Operating	0 to 60 °C	
Rate Time	0.03 - 10 Minute	
Output	Maximum	1.5A.
	Inrush	10A.
Size (mm.)	52 x 52 x 21	
Weight (kg.)	50
